

Narziyev Baxtiyor

Frontend-developer

I am a frontend developer with 2 years of experience. I am able to create a variety of websites, web applications, admin dashboards, and e-commerce stores from scratch. I have experience working with HTML, CSS, JavaScript, React, Redux, TypeScript Next.js. I can work effectively in a team with other programmers and project managers to create the highest quality applications. I am able to make quick decisions and manage time to successfully complete projects on time. I am able to read other people's code and fix bugs.

I am willing to work for your company and believe that my skills and experience will help the company reach new heights in IT.

Thank you for your time and I look forward to the opportunity to discuss my experience and qualifications in an interview.
